

CLINICAL PATHOLOGY LABORATORIES

A Sonic Healthcare Clinical Laboratory

Dear Valued Client,

Clinical Pathology Laboratories is excited to announce the addition of **Dr. Kim Monnin** and **Dr. Zhenjian Cai** to our distinguished Pathology staff. Dr. Cai will join CPL from his current service as faculty in the Department of Pathology at the University of Texas Health Science Center/McGovern Medical School. He serves full-spectrum anatomic and surgical pathology, specializing in gastrointestinal pathology and hepatology. Dr. Monnin is currently serving as Medical Director of Hematopathology at CPL, providing anatomic and clinical pathology professional service and supervision of the Hematology and Flow Cytometry laboratories. She brings continuity in medical services and a deep understanding of the outpatient and hospital medical community and patient populations.

Dr. Monnin completed Fellowships in Hematopathology at the University of New Mexico and Surgical Pathology at the University of Iowa. She is certified in Anatomic and Clinical Pathology with a subspecialty certification in Hematopathology. She is native to Austin, Texas, and has served this medical community since 2012.

Dr. Cai completed a Fellowship in GI Pathology at Mount Sinai/Icahn School of Medicine in New York and a residency in Anatomic and Clinical Pathology at Case Western Reserve, where he served as Chief Resident. He is board certified in Anatomic and Clinical Pathology. At UTHSC in Houston, he is the interim director of the GI/Liver service.

As we implement our new pathology strategy, CPL maintains a comprehensive anatomic and clinical pathology facility. Our anatomic pathology is further nested with full-service on-site flow cytometry, microbiology, hematology, and clinical chemistry. CPL offers an extensive immunohistochemistry menu for both the outpatient and hospital setting on multiple shifts, offers stat services, and hosts state-of-the-art digital platforms. We integrate cytopathology with surgical pathology, which is staffed 24/7 to include grossing on three shifts. We perform more than 1600 Paps/day with next-day TAT in the majority of cases. We offer both PCR and TMA methods for HPV and perform thousands of out-of-vial tests for STIs each day. Our testing is performed in our 100,000+ SF facility in Austin, supported by more than 40 couriers and 180 phlebotomists. *We are streamlining laboratory services that support the triple aim, including better health for patients and populations at a sustainable cost. We believe efficiency, scalability, integration, and value are essential to delivering meaningful, impactful laboratory intelligence.*

Please do not hesitate to contact your sales and service teams directly with any further questions.

Sincerely,
Mark Silberman, MD
President, Clinical Pathology Laboratories
